The **Music project at the German International School Doha** starts with the early music education for children at the age of 1.5 years. (Bim Bam parents child project). When the children finish the early childhood musical education in the 2nd year of kindergarten, they can move on to the instrumental music carousel. There they can try 6 instruments over 12 lessons guided by highly professional musicians (violin, piano, drums, flute, cello, guitar). The carousel helps the children to find their instruments with the support of the teachers.

At 6 years and the entry into the first grade, the children are well prepared for learning a music instrument.

In addition, regular student concerts take place, usually each semester. New to the program are two exciting ensembles : string ensemble and a brass/woodwind ensemble. These can already include complete beginners. Also new is the provision of extra music theory classes. This is an important addition to the programme as it supports and explains in greater detail what is being learned in the practical music lessons. The practical and theory should.
